

**Sometimes we have to look back to enable us to move forward.**

**My Teacher's who are Norch "finished" here in this life. They talked to me about our highly complex Dreaming Creators and told me of our Sacred beliefs of how the Land and Waterways were Created. From beyond the Darling Escarpment to the East. To the Continental Shelf to the West, far beyond Wadjemup or Rottnest Island that it is known today.**

**Our Ancestors practiced Ancient Science through observation experimentation and trial and error of the Natural World that linked up perfectly with the Supernatural and Spiritual Worlds, our religious beliefs. Our Ancient Science has stood for tens of thousands of years at least according to modern science perhaps longer. Since the beginning of time according to our Aboriginal beliefs.**

**My Teachers told me that there are Three World in the Sky and the Land and Waterways and the Subterranean world. All linked in Sacred Spiritual and Physical ways. All are Sacred and important both physically and spiritually. All tell us information about the Environment and our place in this world.**

**In the beginning the Land was flat. To the East of the Darling Escarpment the land began to crack open and magically appeared the Supernatural Rainbow Serpent 🌈🐍. Our Sacred Waugal began its journey to the West. Together with countless other Supernatural beings the Rainbow Serpent carved the Tributaries and valleys of a flat landscape. The natural cycle of life began. The rain from the clouds over the ocean 🌊 moved over the new landscape.**

**The rain created the Sacred Waterways of the Rivers, the Wetlands and the underground freshwater Aquifers that are protected by the sand's and rocky outcrops of the subsurface Karst Limestone ridges above and beneath the ground. We know this from the hills and hard Limestone ridges of Limestone Country that we all know and love today.**

**The Sacred movement's of our Rainbow 🌈 Serpent 🐍 compacted what was like the beach or oceanside sands that we know today. Everything has a meaning and a purpose. Everything was put in it's rightful place. The compacted Limestone ridges of today in the Subterranean and on the surface of the land has purpose and meaning.**

**Freshwater is separated from the Saltwater of the Wardan or Ocean because that is what nature intended. Limestone ridge's of the Swan Coastal Plains give us Life. They must remain intact and be treated as Sacred. Natural Bushland and Waterways are not ours to desecrate and destroy the same as our Limestone ridges of our Coast and River systems. This is Waugal Dreaming and it's all our Sacred Sites. We are all duty bound. Our future generations are the ones that need us now. Not for us but for our Grandchildren and their children.**

**I have the belief of Truth Telling that has sometimes upset the power's that be. In particular Government Developers and Mining interest to name a few.**

- **Chemical Poison**
- **Air Pollution**
- **Land Disturbances**
- **Ground Contamination**
- **Microplastics**
- **Water Pollution**

**The truth is that if we do nothing then we are on the brink of Ecological Collapse.**

**Government and Developers and Business Development/Tourism and Mining interest must listen to the Ancient and Modern science. Our lifeblood is the Health of our Sacred Environment.**

**On behalf of my Aboriginal Ancestors and my people of today.**

**A heartfelt Thankyou to you the People Of The Earth who are here today. Thankyou for all the work you have done and continue to do.**

**May The Ancient Spiritual Dreaming Protect Us Always!**

**IVA HAYWARD JACKSON**
